EXPLANATORY NOTES

Introduction

The Digest contains the latest available figures at the time of issue for a selection of monthly and quarterly series. Where possible, series are shown both in their original and seasonally adjusted form.

Seasonal adjustment

Measures of variability and details of the methods used in seasonally adjusting Bureau statistics are given in Appendixes D and C, respectively, of *Seasonally Adjusted Indicators* (1308.0). This annual publication also contains historical original and seasonally adjusted data in tabular and graphical form of a selection of the statistics appearing in the Bureau's monthly and quarterly publications.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Digest have been adjusted for the effects of calendar variations, namely, "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, e.g. Easter and Australia Day.

Most of the original and seasonally adjusted series are subject to revision.

Related publications

More detailed information is available in the *Monthly Review of Business Statistics* (1304.0). Publications from which the series in the Digest are derived are listed in *Publications*.

All publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

Symbols and other usages

- r — figure or series revised since previous issue
