

WHOLESALE PRICE INDEXES
PRICE INDEX OF ELECTRICAL INSTALLATION MATERIALS
DECEMBER 1972

This bulletin contains index numbers of the Price Index of Electrical Installation Materials on the reference base Year 1959-60 = 100.0.

- Information on the construction of the index is contained in Labour report No. 55, 1970. The index provides comparisons of the overall price changes occurring for a combination of materials, fixed as to quantity and quality. The yearly index numbers for the years 1959-60 to 1968-69 are simple averages of index numbers for the months of August, November, February and May in each year while those for following years are simple averages for the twelve monthly index numbers for each year.
- The items in this index have been selected as representative of materials used in electrical installation in structures such as hospitals, schools, factories and multi-storeyed commercial buildings and flats.
- The items are priced as at the middle of the month for which index numbers are published. The basis of pricing is the price to electrical contractors, delivered on site or into store, Sydney and Melbourne. The price series used relate to specific standards for each item and in some cases are combinations of prices for different makes, types, etc.
- In general, the weights for the index were derived from information relating to the values of materials used in selected representative projects in Sydney and Melbourne during the three years 1960-61 to 1962-63. The projects selected for this purpose had a minimum electrical materials and labour content of \$10,000.
- Table 1 below presents, for individual groups and All Groups, percentage changes shown by the index numbers for the current month relative to the index numbers for the preceding month, and those for the corresponding month in the previous year.
