

**EXPORT PRICE INDEX, AUSTRALIA
OCTOBER 1993**

MAIN FEATURES

AHECC Section	Change between —	
	September 1993 and October 1993 %	October 1992 and October 1993 %
01 Live animals, animal products	-2.1	7.0
02 Vegetable products	-2.2	-1.1
04 Prepared foodstuffs	-0.9	13.0
05 Mineral products	-1.7	-3.1
06 Products of chemical or allied industries	-0.2	1.7
11 Wool and cotton fibres	-3.8	-17.2
14 Gold, diamonds and coin	0.7	13.9
15 Base metals and articles of base metals	-2.1	-10.7
16 Machinery and mechanical appliances	-0.5	1.1
17 Motor vehicles, aircraft and vessels	-0.2	6.9
All groups	-1.5	-1.0

The All groups index decreased by 1.0 per cent between October 1992 and October 1993.

ALL GROUPS

Index Numbers
(Base: Year 1989-90 = 100.0)

The All groups index decreased by 1.5 per cent in October 1993 (-1.4 index points).

The rise in the value of the Australian dollar against the major trading currencies resulted in a general fall in export prices. For a number of base metals, falls in world prices added to the effect of the change in exchange rates. The main items to record price movements in October were: coal (-3.1 per cent); beef (-6.7 per cent) reflecting, in part, lower demand in major markets; and wool (-4.4 per cent) reflecting lower auction prices in previous months.

These decreases were partly offset by small price increases for one quarter of the items in the index.

Percentage change from previous month

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics contact Peter Cordy on Canberra (06) 252 5541 or any ABS State office.
- for information about other ABS statistics and services please contact Information Services on Canberra (06) 252 6627, 252 5402, 252 6007 or any ABS State office.

NOTE: Explanatory Notes are published at the back of this publication.

EXPLANATORY NOTES

Introduction

This publication contains the Export Price Index on the reference base 1989-90 = 100.0. The September 1990 issue of this publication contains a more detailed description of the index. A detailed description of previous Export Price Indexes is contained in *Year Book Australia No. 55, 1969*, pages 256-7 and in *Year Book Australia No. 58, 1972*, pages 240-2 and in the July 1979 issue of this publication.

2. Table 1 contains index numbers for total exports of merchandise from Australia - the *All groups* index.

3. Table 2 provides an analysis of the contribution which selected merchandise exports make to the total *All groups* index (see paragraph 17)

4. Table 3 contains index numbers for selected sections of the *Australian Harmonised Export Commodity Classification (AHECC)*.

5. Table 4 contains index numbers for selected sections of the *Standard International Trade Classification (SITC), Revision 3*.

6. Table 5 contains index numbers for selected Divisions and Subdivisions, on an 'industry of origin' basis, of the *Australian Standard Industrial Classification (ASIC)*. The 'industry of origin' is the industry in which the exported commodity is primarily produced, determined in accordance with the classification rules of the ASIC. It is therefore not necessarily identical with the industry from which the export transactions are actually made. For instance, many exports are made by traders or by marketing authorities, but these exports are classified to the appropriate producing industries, rather than to the wholesale trading industries from which they are actually exported.

Scope of the index

7. The Export Price Index measures changes in prices of *all exports of merchandise* from Australia. It includes re-exports of merchandise (that is, goods which are imported into Australia and exported at a later date without physical transformation). The index numbers for each month relate to prices of those exports of merchandise that are physically shipped from Australia during that month.

Items and weights

8. The index is a *fixed weights index*. The index items, i.e. the commodities directly represented in the index, were selected on the basis of their export values in 1988-89. They constituted approximately 95 per cent of the total value of exports of merchandise from Australia in that year. The selected items were allocated

weights in accordance with the average value of exports for each item in 1988-89. These weights were then revalued to reflect 1989-90 price levels. Many of the items carry not only their own weight but also the weight of unpriced commodities whose prices are considered to move in a similar manner. Full details of the weighting pattern of the Export Price Index, i.e. the percentage contributions for index items and groups, are contained in the September 1990 issue of this publication.

Prices

9. In general, prices are obtained from major exporters of the selected items included in the index. The point of pricing for the Export Price Index is the point at which the goods physically leave Australia, i.e. prices are on the basis f.o.b. at main Australian ports of export.

10. As the prices used in the index are expressed in Australian currency, changes in the relative value of the Australian dollar and overseas currencies can have a direct impact on price movements for the many commodities that are sold in currencies other than Australian dollars. Where exports are sold at prices expressed in terms of a foreign currency and forward exchange cover is used, the prices in the index EXCLUDE forward exchange cover.

11. The price series used relate to specified standards, grades, types, etc. of each commodity with the aim of incorporating in the index price changes for exports of representative goods of constant quality. Wherever possible, prices to predominant export markets are used for each of the specified goods priced, in order to lessen the impact of price variations attributable solely to changes, over time, in market destinations. In most cases prices are combined using fixed weights between markets. Weights between markets are reviewed from time to time and revised where necessary.

Index numbers

12. Index numbers for financial years are simple averages of monthly index numbers.

13. Index numbers for the current month and the previous month are preliminary and subject to revision. However, from time to time, index numbers for earlier months may be revised. This will occur whenever the ABS discovers that prices previously reported by respondents are incorrect and corrected prices are obtained. It can also occur for those exports where some data used in compiling the index numbers has been estimated (e.g. export market combining weights). When final data becomes available, index numbers are revised as far back as necessary.

Analysis of index changes

14. Care should be exercised when interpreting month-to-month movements in the indexes as short-term movements do not necessarily indicate changes in trend.

15. Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

All groups index numbers —

October 1993	93.4 (see Table 1)
less October 1992	94.3 (see Table 1)
Change in index points	-0.9

$$\text{Percentage change} = \frac{-0.9}{94.3} \times 100 = -1.0$$

16. In this publication percentage changes are shown in respect of movements between:

- corresponding months of consecutive years
- consecutive months.

17. Table 2 provides an analysis of the contribution which selected categories of exports make to the All groups index. For example, Mineral products contributed +28.32 index points to the All Groups index number of 93.4 for October 1993 and -0.48 index points to the net change of -1.4 index points.

Related publications

18. Users may also wish to refer to the following publications which are available on request:

Import Price Index, Australia (6414.0) — issued monthly

Price Indexes of Articles Produced by Manufacturing Industry, Australia (6412.0) — issued monthly

Price Indexes of Materials Used in Manufacturing Industries, Australia (6411.0) — issued monthly.

19. Other ABS publications that may of interest include:

Balance of Payments, Australia (5302.0) — issued quarterly.

20. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Unpublished Statistics

21. As well as the statistics included in this and related publications, the ABS has a large range of other relevant unpublished data available. Inquiries should be directed to the contact in the phone inquiries box at the front of this publication.

Symbols and other usages

- p preliminary — figures subject to revision,
- r figure or series revised since previous issue.
- nil or rounded to zero.

Electronic services

DISCOVERY. Key *656# for selected current economic, social and demographic statistics.

PC AUSSTATS. Thousands of up-to-date time series are available on this ABS on-line service. For further information phone the PC AUSSTATS Help Desk on (06) 252 6017.

PC TELESTATS. This service provides:

- foreign trade statistics tailored to users' requirements. Further information is available on (06) 252 5404
- text and tables for selected Main Economic Indicator publications. Further information is available on (06) 252 5405.

Floppy disk service

Selected ABS statistics are available on floppy disk. Further information is available on (06) 252 6684.
