			Plaster and plaster products	+0.3	+6.2
			Miscellaneous materials	+1.2	+7.7
			All groups	+0.5	+5.4

EXPLANATORY NOTES

Introduction

This bulletin contains index numbers of the Price Index of Materials used in House Building. A detailed description of the index is contained in *Labour Report* No. 58, 1973 (pp. 57-69). A Price Index of Materials used in Building other than House Building is published in a separate bulletin (6407.0). *Index numbers for the current month and the previous month are preliminary and subject to revision.*

Scope and composition

2. The index measures changes in prices of selected materials used in the construction of houses. Its composition is in accordance with the usage of materials in actual houses which were selected as representative for the purpose. The index does not purport to represent buildings of any kind other than houses. The house building construction types included are those which use brick, brick veneer, timber or asbestos cement sheeting as the principal material for the outer walls.

Items and weights

3. The index is a fixed weights index. The items and weights were derived from reported values of each material used in selected representative houses constructed in or about 1968-69 in each State capital city. Each State capital city has an individual weighting pattern which reflects the difference in the estimated

relative importance of given items as between cities. In all cases the selection of materials was based on local usage. The weighting pattern for each capital city is applied to local price measures in calculating indexes for that city. The weights for groups of items are shown in Table 2. Further details concerning the weighting pattern are contained in *Labour Report* No. 58, 1973 (Ref. No. 6.7). The reference base of the index is the year 1966-67 = 100.0.

Prices

4. Price series used relate to specified standards of each commodity with the aim of incorporating in the index price changes for representative materials of constant quality.

5. In general the point of pricing is *delivered on site*, but in some cases it has been necessary to use the nearest realistic price available, e.g. that for *supplied and fixed*. The price series are obtained in all State capital cities from representative suppliers of materials used in house building. In the main they are collected as at the mid-point of the month to which the index refers, or as near thereto as practicable.

6. As far as possible, actual transaction prices are used in the index as distinct from *list* prices. Thus measures of special or other discounts are sought where

these are believed to be significant. To the extent that they can be determined, significant changes in special discounts are incorporated in the index but this may sometimes be on a partly estimated basis, and may sometimes necessitate revisions.

Index numbers

7. The index has been compiled for each month from July 1966, and for the financial years from 1966-67. Index numbers for the financial years are simple averages of the relative monthly index numbers. Index numbers for each State capital city and for the weighted average of the six capitals are given for all groups combined in Table 1 and for each group of items in Table 2. The separate city indexes measure price movements within each capital city individually. They enable comparisons to be drawn between capitals as to differences in degree of price movement from period to period, but not as to differences in price level.

Percentage changes

8. Table 1 also shows price movements expressed in terms of percentage changes. The following example illustrates the method of calculating percentage changes, with reference to Table 1.

Weighted average of six State capital cities —
 Index number as at July 1978 259.0
 Index number as at June 1978 258.5
 Percentage change = $\frac{259.0 - 258.5}{258.5} \times 100 = +0.2\%$

Interpretation

9. In interpreting movements in the index, particularly those from month to month, it should be noted that changes frequently occur in an uneven fashion both over time and also, between separate

capital cities, at the same points of time. Changes in index numbers for individual months should not be interpreted in isolation and without reference to changes over longer periods.

Related publications

10. Users may also wish to refer to the following price index publications which are available on request:

- *Price Index of Materials Used in Building Other than House Building* (6407.0)
- *Price Index of Materials Used in Manufacturing Industry* (6411.0)
- *Price Indexes of Articles Produced by Manufacturing Industry* (6412.0)
- *Price Index of Electrical Installation Materials* (6409.0)
- *Price Indexes of Metallic Materials* (6410.0)

11. Other ABS publications which may be of interest include:

- *Wage Rates Indexes, Preliminary* (6311.0)
- *Wage Rates and Earnings* (6312.0)
- *Average Weekly Earnings* (6302.0)

12. All publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

Symbols and other usages

- p preliminary — figures subject to revision.
- r figures revised since previous issue.
- nil or less than half the final digit shown.
